

How Fish Breathe

Science Experiment

Method

1. Mix 2 tablespoons of sand or coffee into the water.
2. Use the coffee filter to line the funnel. You may need to fold the filter into quarters and open it out to make a cone.
3. Place the funnel over the bowl.
4. Slowly pour the water mixture through the filter.

You will need:

Bowl

Funnel

Tablespoons

Coffee filter
(represents gills)

Sand or coffee grindings
(represents oxygen in the water)
