

# West Jesmond Christmas Homework

As you enjoy the festive period with your family, we would like you to think about some of the foods you eat.

Also consider the packaging that has been generated over this time.

Could you help an adult to make a meal?

How could you reuse the packaging to create something useful?

If you've been lucky enough to receive a gift involving construction or assembly, share your design with us!

## 1. Make some delicious soup

With adult supervision, make some healthy and hearty winter soup. It could be a favourite family recipe or something you have designed. Consider the winter season: which vegetables do we grow in the UK that you could add to your soup?

## 2. Food Waste

Unfortunately at this time of year there is lots of food waste as we buy more ingredients than we need. How could you create something special out of left overs?

## 3. Packaging

So many things are now packaged in lots of layers of plastic and cardboard. How could you reuse these materials to design and make something useful?

As an example, you could make a game for younger children, a storage container, an educational tool to help you or others learn/practice a skill, or even a bird feeder!

## 4. Construction

Did you have any Lego, Meccano or anything similar and are able to build any impressive structures? This may be entirely through your imagination or following set instructions, perhaps even using tools. Please share your successes and creations with us.

**As a family please complete one, some or all of these things. It is up to you how you want to record this: draw pictures/designs, take photos, send comments to our Facebook and Twitter threads or come in to talk about it in class. Please complete by **Mon 6th January 2020** and be prepared to share what you have done in class.**

**Enjoy creating!**
