ART

Summer Week 1 - Lesson 1

Can you create a picture of the sea?

You can use whichever medium you want – paints, crayons, pencils, chalks. If you use paint you could try colour mixing different shades of blue.

Look at some of the ideas below – you may want to try some of these techniques.
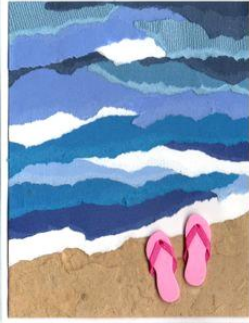

Please share your work on our facebook and twitter feeds.

Lots of strips of material have been used to create a sea effect.

In this one strips of paper have been used to create the sea. Look at all the different shades.

Here the paper was painted with different shades of blue, then scrunched up plastic was used to print more blue on top. Bubble wrap works well for this printing too.

Salt is used on water colours to create this effect. Watch the video to find out how.
