Reading

Monday

Read "Charlie and Lola Look After Your Planet"

<https://www.youtube.com/watch?v=0QBBHvcdrUA>

Tuesday

Poetry Tuesday

Recycling

I got a haircut
saved my hair
placed it outside
on a chair.

So many birds
came that same day
to build from what
I'd thrown away.

And now those strands
from my own head
warm baby birds
asleep in bed.

Wednesday

Choose a book from Epic or Oxford Owls to read.

Thursday

Listen to "Michael Recycle"

<https://www.youtube.com/watch?v=pJweMxEhjlU>

Friday

Fact Friday

Read the Recycling fact cards.

Recycle Week

 Recycle Week happens every year in June. It is a time to remind people to recycle.

 You can recycle:

- plastic, like shampoo bottles;
- cardboard, like tissue boxes;
- metal, like bean tins.

What Is Recycling?

Recycling is when objects are cleaned and changed into something else to be used again. It means things do not go to landfill. We need to put them in a separate bin or bag.

Recycling can help save the environment.

Why Is It Important to Recycle?

- Recycling saves resources.
- Recycling saves energy.
- Recycling helps protect the environment.

Did You Know...?

Clothes can be recycled.

What Is Recycling?

Recycling is when objects are turned into other things to be used again instead of being thrown into landfill. Things are washed and remade using special machines. This helps the planet and environment.

Big Facts

- Both metal and glass can be recycled.
- Recycling one can could save enough energy to power a TV for four hours.
- Clothing can be recycled.

Why Is It Important to Recycle?

- Recycling saves resources, such as coal and wood.
- Recycling saves energy as it takes less energy to recycle than to make new things.

Recycling is when objects made from...

glass

steel

paper

cardboard

plastic

fabric

are taken to a recycling plant and made into other things.

They are used again, recycled into something new instead of being thrown away. If we recycled all the steel packaging used in one year, it would save enough energy to make 50,000 return train journeys between London and Edinburgh.

Why Is It Important to Recycle?

- Recycling saves resources, such as coal and wood.
- Recycling saves energy as it takes less energy to recycle than to make new things.
- Recycling helps protect the environment because less resources are mined from the ground.
- Recycling helps reduce landfill (huge areas of rubbish) as it is instead remade into something else.
